

Urban Water Management Plan Update We Encourage Your Involvement!

The Sonoma County Water Agency is currently preparing an update to its Urban Water Management Plan (UWMP) and welcomes your input. The UWMP update is required by the California Urban Water Management Planning Act and must be completed by July 1, 2011.

The Water Agency is a wholesaler of potable water, serving nine primary municipal customers in Sonoma and Marin Counties. The Water Agency's UWMP will discuss and describe:

- Existing water supplies and transmission system;
- Projected water demands in the Water Agency's service area over the next 25 years;
- Projected water supplies available to the Water Agency over the next 25 years, the reliability of that supply, and general plans for water supply projects;
- Current and planned Water Agency water conservation activities;
- A water shortage contingency analysis;
- And a comparison of water supply and water demand over the next 25 years under different hydrological assumptions (normal year, single dry year, multiple dry years).

**We appreciate your participation in
this important planning process.**

To provide feedback or comments,
email uwmp2010@scwa.ca.gov or
contact Brad Sherwood, public
information officer, at 707-547-1927.

A copy of the Water Agency's 2005 UWMP and current schedule
for preparation and approval of the UWMP Update is available online at
